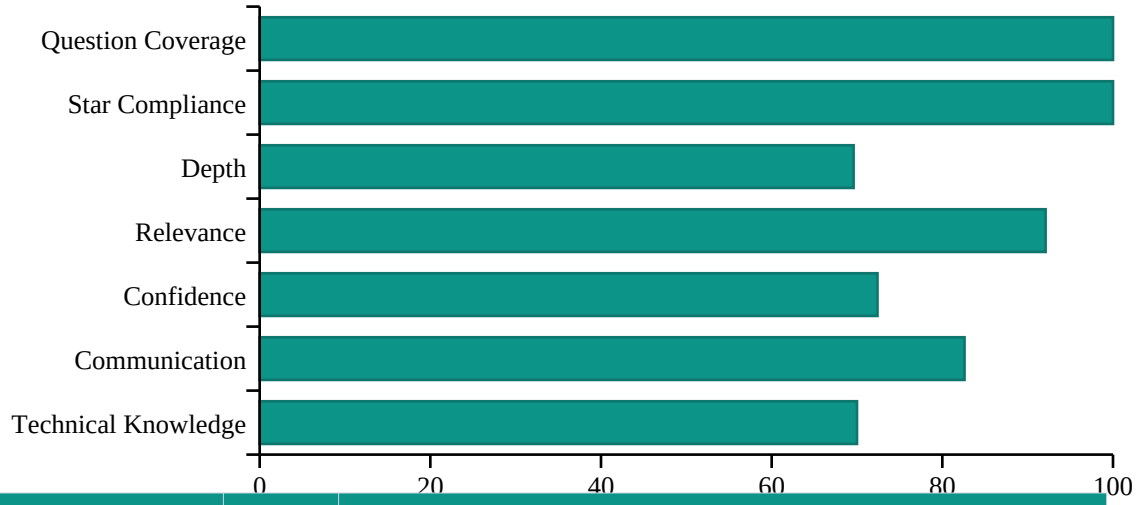
PrepAI Mock Interview Report

Session	d20ea219-fc62-46f3-b59d-94aafa1cd1b3
Role	Software Engineer
Company	—
Type	behavioral
Persona	bar_raiser
Overall score	83.8 / 100

Score breakdown



Dimension	Score	Notes
Technical Knowledge	70.0	Not assessed for this interview type.
Communication	82.6	avg 51.0 words/turn, filler ratio 0.00
Confidence	72.4	avg 51.0 words/turn, hedge ratio 0.007
Relevance	92.1	lexical overlap with interviewer: 0.21
Depth	69.6	longest turn 76 words, multi-sentence turns 3
Star Compliance	100.0	covered 4/4 STAR components (S=1, T=1, A=3, R=3)
Question Coverage	100.0	answered 3/3 interviewer turns

Strengths

• Strong showing in star_compliance (100.0).

• Solid performance in question_coverage (100.0).

Areas to improve

• Work on depth (currently 69.6).

• Sharpen technical_knowledge (currently 70.0).

Next steps

• Re-run the same interview type after targeted practice.

• Pick one weak dimension and drill it with 5 mock questions.

• Review the transcript and rewrite your weakest answer.

Transcript

interviewer: Tell me about a project you are most proud of.

candidate: I built a distributed caching layer for our search service using Redis. The situation was that our queries were taking 800ms at p99 because every request hit the database. My task was to reduce latency below 100ms without changing the application contract. I implemented a write-through cache, added negative caching for empty results, and tuned the cluster to 6 nodes. As a result we reduced p99 to 45ms and saved 40 percent of database cost.

interviewer: How did you handle cache invalidation?

candidate: We used a versioned key with a soft TTL and a pubsub channel that emits invalidations on writes. The team reviewed the design, and I think it was solid overall. We measured 0.1 percent stale reads over a week.

interviewer: Walk me through a failure scenario.

candidate: If a Redis node dies, the client retries the next node. We also have a circuit breaker that falls back to the database with a 200ms timeout, and we alert on cache miss rate above 10 percent.
